Please provide an overview of what your organisation is about – maximum 220 words

Please explain your organisation's products or services, history of innovation and a statement as to why you believe you are a suitable candidate for the Energy Catalyst Mission – maximum 200 words

AIMS OF THE MISSION

The Energy Catalyst is a collaborative research and development grant programme which aims to support highly innovative, market-focused energy solutions in any technology, sector or international market. The programme is open to any technology which meets the needs of poor households, businesses and services in Sub-Saharan Africa or South Asia as well as the energy trilemma of low cost, low carbon and secure energy.

The next round of the programme will launch in June 2019. The aim of this mission is to help organisations that are interested in applying to get a better understanding of the specific energy access issues in Kenya as well as meet in country organisations which might be interested in partnering in an application for round 7.

EXPERIENCE AND AIMS

Technical Readiness – Please explain the relevance of your innovation to the problem of energy access, focusing on what problem it solves, for whom and why it is better than existing solutions. Also describe how your solution tackles the energy trilemma of:

Cost – reducing the price of energy to make energy, including the heating and powering of homes and buildings, accessible to everyone, at a price that's reliable and affordable

Emissions – generating cleaner energy in order to minimise emissions and to protect the environment, which is necessary to meeting the government's green targets and growing a sustainable economy

Security of supply – ensuring the supply of energy to people and businesses is supported by infrastructure that is reliable and secure and prevents the disruption, theft or potential shortage of energy

Describe the technology, product or service that you are developing

Describe your interest and previous experience in the market and sector (your previous experience of technology, research & innovation collaboration(s) as well as your interest in collaborating with Kenyan partners)

Outline your objectives for participating in the mission – maximum 80 words

Opportunity for the organisation - What impact will participating in the mission have on your organisation?
